How DROP works

Go to drop.cwgordon.com
Claim a DROP task
Do the DROP task
Gain valuable Drupal experience!

Some DROP Tasks Already
Completed

- Improve the wikipedia article on Drupal
- Propose Ideas to improve Access control page
- Port Revision Tags module to Drupal 6
- Update SimpleTests for Organic Groups
- Run usability tests on Drupal installation
- Create a logo for DROOP (featured above!)
- Write up a "How to upload your videos" docs
- Create 15 second credits for Dojo videos

How YOU can participate

#1 - Claim a task

#2 - Mentor a task

#3 - Propose a task

Questions?

Helping people contribute to Drupal through the usage of small, bite-sized tasks

About DROP

What runs the DROP site?

DROP, which stands for *Drupal Profile Open Participation*, is a project designed for organizations with the system. There are also a few harder tasks available for more seasoned developers.

What makes a DROP Task?

A DROP task is a short-term task that can theoretically be done in less than a week. It's fine to take as long as they'd like; however, after a week is up, another participant can jump in and

Sample tasks:

- **Code:** [Citation input filter](#): Task gives clear example of expected input and expected output so it won't "creep" into something large and tangly.
- **Documentation:** [Improve documentation for the imagecache module](#): Task is both against what the expected documentation should contain, so that there's no ambiguity about where
- **Usability:** [Improve initial user experience](#): Contains both a list of things to check for as part of expected results.
- **Videos:** [Create a video showing how to install and use TortoiseCVS](#): Covers all of the major video, etc. Also is something that will be helpful to a *large* segment of the Drupal community.

Adding a task to DROP

Theme: Pixtute
